WordPress Developer - Job Form

Role & Responsibilities

- Deliver secure, scalable, and easy to maintain WordPress solutions using engineering best practices and relevant coding standards.
- Write test cases for all the code you develop.
- Write and maintain technical project documentation including inline code commenting, git repo readme, and good commit messages.
- Respect timelines and communicate progress proactively. We are a remote team so proactive communication is very important.
- Help other engineers on the team through architectural review, code reviews, and other peer reviews.

Must Haves

- PHP, MySQL, HTML, CSS, JavaScript & jQuery
- Knowledge of WordPress plugin and theme development
- Background job processing
- Good understanding of computer science fundamentals.
- Comfort with git-based development and deployment workflow.
- Understanding of WordPress Coding Standards

Application Process

There is no deadline to submit your assignments/work samples, however, the application will move forward only after we receive those details.

Having prior WordPress experience and work

UPLOAD	FIX	APPLY	INTERVIEW	HIRED
Run your existing WordPress code through rtCamp's Starter Repo	Go through the PHPCS issues marked on your repo and fix them	Send your job application form with the links to your repo	Get on a call with rtCamp's team for an engaging conversation	Get hired and be a part of the growing global team a.k.a the rtFamily

- If you developed some WordPress themes or plugins but did not follow coding standards, you can still get your own code upto the mark by running them through WordPress Coding Standards.

- We recommend you to use wp-starter assignment (rt.cx/wp-start) to proceed further.
    - If you manage to fix **phpcs feedback** — first accept our congratulations for becoming a pro developer.
    - You may read more about the best practices for the use of the wp-starter assignment on our Assignments Page (rt.cx/wp-assignment).

- Once done, submit your application with the links to your work on Github.

- The basic requirement is to review your code, so ensure the links you share are accessible by us.

- After the review of your work, on the basis of your performance in the coding round, you would be called for a remote interview.

Not having prior WordPress experience and work

COURSE	FIX	APPLY	INTERVIEW	HIRED
Take rtCamp's WordPress Training Course and become a better developer	Run the code through rtCamp's starter repo and fix the PHPCS issues	Send your job application form with the links to your repo	Get on a call with rtCamp's team for an engaging conversation	Get hired and be a part of the growing global team a.k.a the rtFamily

- Log on to https://learn.rtcamp.com / rt.cx/wp-learn
- Register as a user, this will help us and you track your course progress.
- After completion, submit links to the assignments you developed in the course along with their demo URLs through the application form.
- The goal is to monitor your progress through the course along with the code review of your assignments.
- Application Form URL – rt.cx/wp-apply
- After the review of your work, on the basis of your performance in the course and the coding round, you would be called for a remote interview.

Important details

- There is NO minimum criteria for applying i.e. you can apply irrespective of which stream you are from, whether you have a year down or have active backlogs — as long as you can complete our assignments!
- All the students not having prior WordPress experience and work will need to complete the course and assignments provided by us.
- All the code should be uploaded to GitHub only.
